

GETCAP

GREATER EAST TEXAS COMMUNITY ACTION PROGRAM

Weatherization

PURPOSE

To increase the energy efficiency of single family, multifamily, and mobile homes occupied by households with low incomes, focusing on the elderly, those with disabilities, and families with children, while ensuring health and safety.

The Weatherization Program focuses on energy saving measures including **attic insulation, wall insulation, caulking, weather stripping, high efficiency heating and cooling equipment, refrigerators, LED lighting and health and safety measures.**

- *Households are eligible if they are at 200% of the federal poverty guidelines or less.*
- *The structure must be able to benefit from being weatherized.*
- *Assistance is based on a case by case basis.*
- **GETCAP does not have a home repair program. We do not repair roofs, plumbing or electrical issues. RVs -Recreational Vehicles are not eligible.**

WHAT WE CAN OFFER

- Energy Audit (a review of your home's energy efficiency, which identifies where air leaks may be occurring, inefficient appliances – such as refrigerators, etc.)
- Installation of weatherization measures to increase energy efficiency of a home:
 - Insulation, caulking, weatherstripping, LED bulbs, smoke detectors, CO detectors.
 - High efficiency heating and cooling equipment.
 - Mobile home and conventional home measures.
 - Replacement of refrigerator and/or stove.
 - **NO COST TO THE HOMEOWNER.**
